</tbody>
</table>

- UK Car profit up slightly to £223m; lower proportion of Group due to improved price comparison result and lower other costs
- Overall international Insurance loss of £13m includes another ConTe profit offset by ongoing investment in USA and France
- Improved comparison result (loss of £1m v loss of £4m) includes good result from Confused.com in the UK
- Other includes Household (£1m profit), share scheme charges, debt servicing cost

\(^1\) Profit before tax adjusted to exclude minority interest share.
Solvency position remains strong

- **Eligible Own Funds (Pre dividend)**
  - £1.02bn
- **Dividend (H1 2016)**
  - £0.17bn
- **Eligible Own Funds (Post dividend)**
  - £0.85bn
- **Solvency Capital Requirement**
  - £0.47bn

**Solvency ratios**

| Solvency ratio (Pre Dividend) | 217% |
| Solvency ratio (Post Dividend) | 180% |

- **Group Solvency Capital Requirements (SCR)** based on Solvency II Standard Formula plus an agreed Capital Add-On (CAO)
- **Post-Brexit yield curve movements** reduced solvency ratio by approximately 20%
- **Post-dividend solvency ratio** with volatility adjusted yield curve = 196%
- Admiral is developing a partial internal model to calculate the capital requirement and expects to apply for regulatory permission during 2017
- **Target solvency coverage range** will be confirmed once partial internal model approved. Still expect 125%-150%

Note: (1) Estimated (and unaudited) solvency II capital position at date of this report (17 August 2016). Includes impact of July 2016 yield curve movements based on EIOPA 31 July 2016 yield curve. Impact of deferred tax on SCR remains under discussion with PRA (maximum impact 3% of SCR). (2) Volatility adjustment application subject to approval by UK PRA and Gibraltar FSC.
Additional return of capital

- Solvency ratio of 180% (196% volatility adjusted)
- Currently expect to return £100m - £150m in additional return of capital up to the middle of 2018 (figures include £66m already paid/declared)
- Currently envisage additional return of capital with final 2016 dividend of c£20m
- The amount to be paid will be reviewed at each reporting date and will depend on market conditions and business plans at each point
- Additional return of capital will be separately identified
- To date these total £66m, including £33m paid with this 2016 interim dividend
Interim Dividend of 62.9p Per Share

### Interim 2016 dividend

- **Normal dividend (at 65%):** 36.8p
- **Special dividend:** 14.2p
- **Additional return dividend:** 11.9p

### Normal plus special dividend: 51.0p

- **H1 2016 Normal plus Special dividend = 51.0p per share** (total = £142 v £140m interim 2015)
- **H1 2016 payout ratio = 91%**
- **Additional return with interim 2016 dividend = 11.9p per share; £33m**
- **Total interim dividend = £175m v £140m interim 2015**

### Dividend Dates

- **Ex-dividend date:** 8th September 2016
- **Record date:** 9th September 2016
- **Payment date:** 7th October 2016

### Additional Points

- Admiral will pay 65% of post-tax profits as a normal dividend each half-year (up from 45%)
- Admiral expects to continue to distribute all earnings not required to be retained for solvency and buffers
- Admiral expects Normal plus Special (before additional returns of capital) to be of the order of 90-95% of earnings for foreseeable future
Dividend History

Cumulative dividends since flotation:
- Normal: £1.10 billion
- Special: £1.14 billion
- Total: £2.24 billion
Investments update

Investment analysis

Dec ‘15: £2,589m
June ‘16: £2,651m

- Cash
- Deposit
- Gilts
- Fixed income
- MM funds

Investment income

- H1 2015 and 2016 interest and investment income distorted by differences in accounting for income on quota share funds withheld
- H1 2016 also includes £5.5m foreign exchange gain
- Underlying net income increased by 30% to £13m due to higher rate of return on larger balances

Net investment income\(^1\) (£m)

- H1 2014: 7m
- H1 2015: 9m
- H1 2016: 28m

\(^1\)Note: Investment income net of interest cost on bond. Income figures include interest on gilts purchased with bond issue proceeds.

</table>
Market profitability in 2015 relies on reserve releases

- Breakeven relies on continued exceptional reserve releases
- Market price increases started earlier than in previous cycles, is it likely that Gross CoR has peaked in 2015?
- Gross combined ratio relatively flat from 2014 to 2015

Source: EY ‘UK Motor Insurance Results Seminar’ June 2016
Note: (1) Net/Gross Combined Ratio includes/excludes the impact of reserve releases respectively.
Headline price increases are flowing through to earned premiums

- Price increases have led to more shopping and an increase in new business policies for the market

Note: (1) Premium data has been adjusted to remove the effect of IPT increase in Q4 2015. Source: ABI Motor Insurance Premium Tracker Q2 2016
More shopping and strong competitiveness is fuelling Admiral growth

Admiral Times Top

- 2014 – Admiral increased prices ahead of the market
- 2015 – Admiral increased prices slightly behind the market
- HY 2016 – Admiral increased prices in line with the market

- Resulted in 11% vehicle growth year on year
- H1 2016 new business volumes have increased
- Last 12 month price increases in line with market increases

Note (1) Times top rolling 6 month average indexed to 100 from December 2013.
Admiral’s back year loss ratios continue to improve

- Positive development of 2014 and prior
- Cautious initial reserving of 2015, reflecting inherent uncertainty of large BI
- H1 2016, we’re benefiting from price increases and claims inflation has been moderate

Note: (1) Analysis of PRA returns as at 31 December 2015. Market excludes Admiral. Loss ratio: accident year. (2) Independent actuarial projection of ultimate loss ratio on accident year basis
Loss ratio improvements and reinsurance commutations flow into reserve releases

Admiral releases as % of premium

- Strong reserve releases reflect very positive evolution of ultimates
- A similar level of reserve release in H2 2016 would require further large improvements in ultimates
- Reserves margin remains at the high end of Admiral’s reserving policy range

Reserve releases and commutations

- 2014 u/w year commuted at start of 2016
- Prudent reserving means the 2014 commutation reduced commuted reserve releases
Admiral maintains a strong expense ratio advantage

- Expense ratio increases slightly in H1 2016 due to acquisition costs to drive 11% growth in active vehicles
- We’re still maintaining our advantage

Note: (1) Admiral expense ratio is on a written basis. (2) Analysis of PRA returns as at 31 December 2015.
Strong performance for UK car insurance

**Turnover**

- **H1 2014:** £850m
- **H1 2015:** £858m
- **H1 2016:** £993m
  - Increase: +16%

**Profit Before Tax**

- **H1 2014:** £208m
- **H1 2015:** £219m
- **H1 2016:** £223m
  - Increase: +2%

**Customers**

- **2010:** 2.46m
- **2011:** 2.97m
- **2012:** 3.02m
- **2013:** 3.02m
- **2014:** 3.15m
- **2015:** 3.30m
- **H1 2016:** 3.52m
  - Increase: +7%

**Notes:**

1. Turnover is a non-GAAP measure and consists of total premiums written (including co-insurer’s share) and Other Revenue.
The largest telematics player

- Market leader in active customers
- Currently c5% of the market
- We have a large amount of data that we can utilise effectively

Telematics policies¹

Note: (1) Admiral policy number from company data as of H1 2016. Competitor data from company FY 2015 disclosures.
Guidewire brings benefits

Core administration system - renewed after 24 years of ‘I90’:

- Strategic flexibility
  - Add new products more easily

- Operational efficiency
  - Allows smoother and faster operational changes
  - Staff training is shorter and easier

- Customer experience
  - Offers customers more options and product flexibility
  - Reduced scope for manual errors

- Modernisation
  - Updates data warehouse to support ‘single customer view’

Claims administration system - in-house workflow remains in place
UK household market continues to move towards price comparison distribution

- Market loss ratio has worsened as a result of weather events
- 2016:
  - Market expense ratio impacted by Flood Re levy
  - Market loss ratio affected by severe flooding events in the first six months

- Continued trend of customer migration online, in particular to price comparison
- Over half of new business sales now originate through aggregators with potential for even more growth in this channel in the future

Note: (1) Market data from Deloitte Home Insurance Survey Reports 2013 - 2015. (2) UK market price comparison sales data from management information.
Household policy growth continues and underwriting remains strong

- Over 380,000 customers at H1 2016 representing an increase of 23% on 31 December 2015
- Continued improvement as the book matures
- Admiral was largely unaffected by bad weather in 2015 and the first 6 months of 2016

Note: (1) Market data from Deloitte Home Insurance Survey Reports 2013 – 2015. Admiral data based on a written basis excluding the effects of ancillaries.

**Drivers of confused.com result**

- Growth in UK PCW market
- Media spend inflation slowed versus same period last year
- Website improvement and strong promotional activity has led to better conversion

**Future strategy**

- Driver centric strategy with a car specialist approach
- Celebrity advertising to accelerate the campaign
- Development of new products to help drivers save time and money on their car costs

**Note:** (1) Quote request per product per customer per month.
### Rastreator and LeLynx momentum continues

#### Performance

**Rastreator**
- Rapid growth in 3 main product lines of insurance, telephony and finance
- Focused on TV and media advertising to deliver long-term multi-product strategy

**LeLynx**
- Market leader in a competitive market
- Has continued to educate the market on the benefits of price comparison with significant TV spend

#### Outlook

**Rastreator**
- Maintain market leadership and continue to expand product range
- Grow multi-product strategy

**LeLynx**
- Continue to develop and educate the French market
- Develop a multi-product strategy with a focus on several insurance products

  - H1 15: 43k
Key priority – grow share in price comparison

- Wider footprint (France)
- Maximum conversion efficiency (France in-sourcing)
- Strengthen brands (marketing investments up from 2% GWP to 6%)

### TV spend as a % of GWP

**ConTe**
- H1 2015: 0%
- H1 2016: 7%

**Admiral Seguros**
- H1 2015: 5%
- H1 2016: 4%

**L’olivier**
- H1 2015: 3%
- H1 2016: 8%
US Insurance

**Turnover ($)**

- **Elephant**
  - $92.4m
  - H1 15: $63.4m
  - 46% increase

- **Customers**
  - 150k
  - H1 15: 122k
  - 23% increase

---

**Impact of hail on Elephant’s loss**

- **H1 2016 Loss**
  - -$8m

- **Normal Hail Loss**
  - -$2m

- **Exceptional Hail Loss**
  - -$6m

---

*Note: (1) Whole account basis*

---

*Everything's bigger in Texas!*
Key priorities – improve loss ratio

- Rapid price increases year-on-year (+15% in Texas, +8% in Virginia)

- Reduction in renewal capping to improve renewal loss ratios

- Accelerating pricing refinements
Elephant’s new states

- Now in 6 states
- 91st largest auto insurer in the US!
- New states allow:
  - Faster move to efficient scale
  - Trials of different marketing strategies

- Texas
- Illinois
- Maryland
- Virginia
- Tennessee
- Indiana

Admiral has five operations with shared ownership: Rastreator (Admiral share of ownership 75.0%); compare.com (71.1%); Admiral Law and BDE Law (90.0%); Preminen (50.0%)

- Profit or losses in period accruing to minority parties reduce or increase the results respectively

- compare.com is 29% owned by third parties. Total loss was £14.3 million, therefore £4.2 million is added back to Group Profit Before Tax

- The impact of other minority interest is not significant

UK Car Insurance: Booked Loss Ratio development by underwriting year

- The impact of a 1% improvement can also increase as the combined ratio drops and Admiral receives a higher share of the available profit.
- The impact includes the change in net insurance claims along with the associated profit commission movements that result from changes in loss ratios. The figures are stated net of tax at the current rate.
- The impact is not linear due to the nature of the profit commission arrangements eg. the impact of a 5% move cannot be calculated by multiplying the 1% impact by five.

### Sensitivity of booked loss ratio

<td>£11m</td>
<td>£7m</td>
<td>£3m</td>
</tr>
</tbody>
</table>

**Note:** underwriting year basis, therefore direct comparison to ultimate loss ratios on accident year basis is inappropriate.
### Reinsurance arrangements

#### Motor
- Fully placed reinsurance arrangements until the end of 2018
- Similar contract terms and conditions
- Planned reduction of underwriting share from 25% to 22% with effect from 2017
- Munich Re continues to underwrite 40% of the UK business until at least the end of 2018

#### Household
- Similar long term quota share contracts to UK motor
- Admiral retains 30%
The sensitivities below have been selected to show a range of impacts on the reported base case solvency ratio. They cover the two main material risk types - insurance risk and market risk. Within each risk type the sensitivities performed cover the underlying drivers of the risk profile. The sensitivities have not been calibrated to individual return periods.

### Scenarios
1. Currency – 25% movement in € and $
2. ASHE – long term ASHE +0.5%
3. UK Motor – CAT 1 in 200 event
4. UK Household – CAT 1 in 200 event
5. UK Motor – incurred loss ratio +5% (2014 & 2015 u/w years)
6. UK Motor – incurred loss ratio +1% (2014 & 2015 u/w years)
7. Interest rate – negative yield curve -50 bps
8. Interest rate – positive yield curve +25 bps
9. Credit – spread +100 bps

---

Note: Estimated (and unaudited) solvency II capital position at date of this report. Impact of deferred tax on SCR remains under discussion with PRA (maximum impact 3% of SCR).
UK Car Insurance – whiplash regulatory reforms update

<table>
<thead>
<tr>
<th>MOJ introduced</th>
<th>Fixed cost medical fees</th>
<th>Deregulation Act</th>
<th>Accreditation</th>
</tr>
</thead>
</table>

- LASPO reforms (Jackson)
  - ban of referral fees
  - change to MOJ costs
  - portal limit increase to £25k
  - fixed recoverable costs

- MedCo introduced

- Autumn Statement

Focus area | Update
--- | ---
**Autumn Statement**<br>Reform has two main elements: | The whiplash reforms were announced in November 2015 and a consultation was scheduled for early 2016 which would centre around how to implement the new policy. The consultation has not yet materialised and key stakeholders in the project are no longer in the Government post Brexit. All, or part, of these reforms may still be implemented but it is likely that implementation will be delayed. Notwithstanding the above, the ABI continue to prepare for the second change and funding is being sought to amend the MOJ Portal to ensure that unrepresented claimants can access it as those running their own claim are likely to require more protection.

- **payment of general damages for minor whiplash injuries** - departure from current position and requires primary legislation. Will face stiff opposition claimant lawyers. The ABI are supportive of the change; and | First party models are radical, though more likely is an attempt to apply better regulation and uniformity to the current market. As with whiplash reform, this resides with Government.

- **Small Claims Track limit rise from £1000 to £5000** - does not require primary legislation and can be achieved by rewriting existing rules. | The new Justice Secretary/Lord Chancellor has indicated enthusiasm for introducing more technology into the legal system.

**Credit hire market**<br>Tied in with the above whiplash reform are proposals to amend the credit hire market. There are a number of different proposals aimed at reducing costs and the bad practices that can accompany credit hire claims. | Both changes have the aim of reducing cost and improving efficiency.

**Other proposals**<br>- **fix all legal fees for cases up to £250k** (Lord Justice Jackson); and<br>- **introduce technology into the Courts** (Lord Justice Briggs) - such that more disputes are resolved online rather than in a Court room. | |
## Key regulatory reviews

### Financial Conduct Authority (‘FCA’)

**1. General Insurance Add-ons**
FCA published a market study on general insurance add-ons in July 2014. Review proposed remedies to address concerns that the market is not working in customers’ best interests. Most have been implemented and the FCA is now focusing on the final remedy – an industry-wide value measure. The regulator remains committed to conducting a 12-month pilot from summer 2016.

FCA has also published a number of case studies to clarify expectations regarding the opt-out selling ban and information guidance with a 30 September 2016 deadline.

All insurers impacted:
- A. public disclosure of claims ratio by product; and
- B. changes to disclosure and process.

Admiral will ensure it adheres to the disclosure requirements.

### 2. Price Disclosure
FCA has launched a consultation on new rules to require firms to disclose last year’s premium and remind long-standing customers to shop around to address the impact of differential pricing at renewal. A policy statement was published in August 2016 outlining the requirements to come into effect on 1 April 2017.

All insurers impacted:
- A. disclosure of last year’s premium on renewal documents.

Admiral will ensure it adheres to the disclosure requirements.

### 3. Vulnerable Customers
FCA has published an Occasional Paper on the needs of vulnerable customers as well as a Discussion Paper specific to the ageing population, which highlight an expectation to provide additional support. The Association of British Insurers (ABI) and the British Insurance Brokers’ Association (BIBA) have jointly published a Code of Good Practice to improve renewal processes for vulnerable motor and home customers.

All insurers impacted.

Admiral has a Vulnerable Customers Policy in place.

### Competition and Markets Authority (‘CMA’)
In March 2015, CMA published the Private Motor Insurance Market Investigation Order 2015 concerning the implementation of the remedies contained in its private motor insurance final report; notably, in relation to protected and guaranteed No Claims Bonus (NCB). It looks to ensure customers can make an informed decision. This came into effect from 1 August 2016.

All insurers impacted:
- A. disclosure of detailed NCB information to customers; and
- B. specific statement that advises customer the NCB protection does not protect the policy premium in the event of a claim.

### European Union (‘EU’)
The Insurance Distribution Directive (IDD) was published on 2 February 2016. The Directive came into force on 22 February 2016, meaning Member States will have until 23 February 2018 to transpose the requirements into national law. The FCA does not anticipate major changes to existing UK training and competency requirements.

All insurers impacted.

Admiral is monitoring any changes.

</tr>
<tr>
<td>Expense Ratio</td>
<td>The ratio can be calculated on an earned or written basis. Expressed as a percentage, of (i) net operating expenses, either divided by (ii) written or earned premiums, net of reinsurance.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Combined Ratio</td>
<td>The sum of the loss ratio and expense ratio.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Co-insurance</td>
<td>An arrangement in which two or more insurance companies agree to underwrite insurance business on a specified portfolio in specified proportions. Each co-insurer is directly liable to the policyholder for their proportional share.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Reinsurance</td>
<td>An arrangement in which a reinsurance company agrees to indemnify another insurance company, against all or a portion of the insurance risks underwritten by the ceding company under one or more policies. Reinsurance does not legally discharge the primary insurer from its liability with respect to its obligations to the insured.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>XOL Reinsurance</td>
<td>An arrangement in which a reinsurance company agrees to indemnify another insurance company for claims above a certain level. For example if XOL reinsurance level is in excess of £5m, for any individual claim that is in excess of £5m the reinsurance company covers all the costs above £5m.</td>
